

Please do not allow cell phone use on airplane flights. It's bad enough that I have to put up with it in restaurants, theaters, grocery stores, department stores, etc.. But in those instances, I can leave--but that's not possible in an airplane. Having 200+ people all talking at the same time is not my idea of a pleasant plane ride--it's noisy anyway and this would make it even worse. Do not allow cell phone use on airplanes. Thank you.
